Education

STANFORD GRADUATE SCHOOL OF BUSINESS Stanford, CA
Master of Business Administration Candidate 2028

NORTHWESTERN UNIVERSITY Evanston, IL
B.S./M.S. in Computer Engineering, Magna Cum Laude | GPA: 3.89 2015–2019

- **Coursework:** Computer Architecture; Systems Design; Network and Systems Security; Physically-Based Simulation (Computer Graphics); Human-Computer Interaction
- **Awards:** Departmental Honors (Senior of the Year); IEEE-Eta Kappa Nu; Dean's List (10/11 quarters)
- **Leadership:** Residential College President; VP, Residential College Board; National Residence Hall Honorary

Experience

QERIS (pre-seed autonomous drone navigation startup) Singapore
Intern, Go-to-Market 2026

- **Customer Discovery & Market Validation:** Validated use cases for autonomous terrain navigation with 3 Singapore defense organizations; secured follow-up evaluations with 2 (Air Force, Army).

REPUBLIC OF SINGAPORE AIR FORCE, Singapore 2015–2026
Flight Commander (Department Head; promoted early to Major, first in cohort) 2023–2026
Capability Development Officer, Digital and Intelligence Service HQ (founding officer) 2021–2023
Fire Unit Commander (Air-Defense Team Lead) 2019–2021

Hardware & Software Product Requirements and Roadmap Priorities

- **Product Strategy:** Defined missions, payload requirements and fleet mix for an autonomous drone-swarm capability; presented a live demo to senior leadership, winning next-phase approval and funding within 1 year.
- **User Requirements:** Drove a 2-year Aster 30 missile system upgrade end-to-end: turned operator needs into hardware and software requirements, then led 3 engineers, 1 project manager and external partner organizations through user testing and an end-to-end operational trial to field a new capability on time and within budget.
- **Prioritization:** Owned budget and roadmap priorities for an 8-product, US$40M portfolio; set top-level requirements, kicked off approved projects with technical partners and restructured its 50+ person department.
- **Partnerships:** Led international engagement strategy; initiated and expanded 6 new defense and international partnerships.
- **Executive Communication:** Co-developed the annual workplan and speeches presented to political office holders.

Product Launch & User Adoption

- **Product Launch in a Changing Environment:** Cut critical-incident response time 30% as product owner of an AI-enabled open-source data tool for cyber research: took over mid-build and cut scope to ship on time; 100% adoption in 1 month.
- **User Adoption:** Drove adoption of AI and digitalization tools: replaced 7 of 9 daily paper processes for a 120-person unit with digital workflows, building some automations hands-on; cut paperwork 80% at 90%+ adoption.

Strategic Problem Solving & Quantitative Analysis

- **Rapid Prototyping:** Saw one crew role lose ~2 hours/day to radio-relayed data entry; shipped an equipment-tracking web tool in 1 week (prototype in half a day), saving ~700 hours/year; maintenance-free for 4+ years.
- **Experiment Design:** Cut crew staffing 17% (6 to 5 operators) at full output, validated through time trials and a phased rollout; personally took the first shift under the new model.
- **Process Redesign:** Cut response times 20%+ by redesigning crew processes for a 12+ person team.

Project, People & Organizational Leadership

- **Team Leadership:** Led 24/7 air-defense operations for a 30+ person team, meeting 100% of readiness requirements; unit named Best Ground-Based Air Defence Unit in the Air Force (2024, 2026).

NATIONAL DAY PARADE EXECUTIVE COMMITTEE Singapore
Organizing Secretary, Parade Operations (2021); Deputy Chair, Parade Safety (2025) 2020–21, 2024–25

- **Complex Project Delivery:** Drove a 50-minute live televised segment end-to-end, from concept to broadcast under COVID-19 rules (2021); led safety for 150+ volunteers across shows drawing 200,000+ spectators (2025).

Additional

Honors: Singapore Armed Forces Scholarship (2015; awarded to <10 officers a year)
Skills & Certification: Python, JavaScript, React, Node.js, C++, Java, HTML/CSS, VHDL/Verilog; Certified Scrum Master
AI & Agents: Claude, Gemini, Notion AI; built a shared knowledge base for multi-agent workflows
Projects: Telegram multiplayer game bot; p5.js card-game engine; web camera built from components (WiFi, microprocessor)
