Education

STANFORD GRADUATE SCHOOL OF BUSINESS Stanford, CA
Master of Business Administration Candidate 2026-2028

NORTHWESTERN UNIVERSITY Evanston, IL
B.S./M.S. in Computer Engineering, *Magna Cum Laude | GPA: 3.89* 2015-2019

- Awards**:** Departmental Honors (Senior of the Year); IEEE-Eta Kappa Nu; Dean's List (10/11 quarters)
- Study Abroad**:** ETH Zürich, Switzerland (Fall 2018): Network/Systems Security, Human-Computer Interaction
- Leadership**:** Residential College President; VP, Residential College Board; National Residence Hall Honorary

Experience

QERIS Singapore
Intern Aug 2026

- Drove Singapore defense stakeholder outreach for pre-seed AI drone startup; owned Go-to-Market strategy
- Converted RSAF and Singapore Army into active evaluators of autonomous terrain navigation technology; initiated DSTA pipeline, expanding total addressable stakeholder base to 3 agencies.

REPUBLIC OF SINGAPORE AIR FORCE Singapore
Fire Unit Commander → Product Manager & Plans Staff → Flight Commander (Dept Head) Jul 2019–Jul 2026

Technical Program & Product Ownership

- Owned a 2-year Aster 30 air-defense system upgrade end-to-end, from technical design through acceptance testing, interfacing and coordinating a 4-person engineering team and external engineering partners on milestone and deliverable management, user testing, and acceptance — delivered by Jul 2026, on time and within budget. Defined full software/hardware requirements and led user and acceptance testing, ensuring all tests passed on first trial.
- Served as product owner for a LLM-based digital defence capability, driving delivery from mid-build through design reviews and testing to on-time, on-budget deployment; drove full user adoption within one month of rollout and cut critical-incident response time 30%.
- Managed a $50M+ portfolio of 8 capital and capability-development projects while restructuring a 50+ person department to align resourcing with mission priorities.

Building & Automation

- Independently ideated, defined, built and deployed a web-based equipment-tracking tool, prototyped in half a day, production in one week, eliminating ~700 man-hours/year; maintenance-free for 4+ years.
- As Innovation Advisor for a 120-person unit, shipped secure internal tools and AI-driven automation that cut manual paperwork by 80% and reached 90%+ workflow adoption.

Operations & Cross-Functional Leadership

- Directed 24/7 air-defense operations across a 30+ person team, sustained 100% operational uptime.
- Led an organizational redesign that cut manpower requirements 17% while sustaining full operational output, using time trials, stakeholder feedback, and phased rollout to de-risk implementation.
- As Deputy Chair (Parade Safety) on National Day Parade Executive Committee (2025), owned risk management and incident response across 150+ volunteers for a 200,000-spectator event.

Additional

- Honors: Singapore Armed Forces Scholarship (2015); Public Sector Leaders Programme (2020)
- Technical Skills: Python, JavaScript, React, Node.js, C++, Java, HTML/CSS, VHDL/Verilog
- Program Skills: Agile/Scrum, cross-functional delivery, workflow automation, change management
